Professional Summary

Experienced **Java Developer** with **5 years** of expertise in designing and deploying scalable backend systems and full-stack applications. Proficient in Java **Spring Boot**, **Angular**, **Vue**, **Kafka** and cloud technologies like **Docker**, **Kubernetes**, and AWS. Skilled in leading small teams building innovative solutions, and optimizing workflows. Successfully developed projects in fintech, travel, and infrared camera technologies, delivering high-performance and maintainable software.

Technical Skills

- **Languages**: Java, Typescript, Shell scripts. (Learning: Kotlin, Jetpack Compose)
- **Tools, Frameworks and Libraries**: Spring boot, Hibernate, Spring Security, MapStruct, Jasypt, OpenFeign, JHipster, Liquibase, Grafana, Loki, Zipkin, Angular, Jenkins, Github Actions, Gitlab runners, Dockerfile, Docker Compose.
- **Databases**: PostgreSQL.
- **Version Controls**: Git, Github, Gitlab.
- **Testing Tools**: Postman, Junit5, Jupiter, JaCoCo, SonarQube.

Experience

Java Developer | PowerCorp | 11-2024

- **Built and optimized transaction processing flows** in a Fintech payment system, ensuring **ACID guarantees**, idempotency, and consistency across distributed microservices.
- **Introduced parallel execution pipelines** using **CompletableFuture** to speed up validation, risk scoring, and external API calls, improving request latency and throughput under load.
- **Migrated concurrency model** from unmanaged futures & thread pools to **structured concurrency** using Java **Virtual Threads** (Project Loom) and **Scoped Values**, reducing context leakage and simplifying error propagation.
- **Replaced ThreadLocal context propagation** with **Scoped Values**, ensuring secure, audit-proof user/session data handling during transaction execution.
- **Enhanced observability** of parallel transactional workflows via **Zipkin/Prometheus/Grafana**, enabling trace-level visibility into payment execution paths.

Java Developer | SmartIR | 11-2022-> 07-2024

- Led a startup team focused on developing projects utilizing **Infrared Cameras**.
- Implemented a microservices architecture using **Docker**, **Docker Compose**, and **Spring Boot**.
- **Led** a small team of 3 members, with the objective of developing a web application using **Vue.js 3** and **Quasar** for the frontend, and **Spring Boot** for the backend.

- Utilized **Jenkins** for setting up and managing **CI/CD pipelines.**
- Gained experience in developing and deploying a microservices system using **Kubernetes** and Docker Hub with **Spring Cloud Gateway**.

Java Developer | Gainex Crypto Market| 10-2021 –> 09-2022

- Took a role in development of website from scratch using **VUE** with **Quasar** and **Laravel** with **Spring boot**.
- **Optimized** data flow with **Kafka** and **Spring boot** of huge statistics in back end for optimal delivery for smooth UX.
- Created simple **micro service** system with **Spring boot** and **Kafka**.
- Adapted and applied well-established clean **code techniques**, **design patterns**, and **SOLID** system to solve commonly occurring problems.

Education

2007-2012 International Turkmen-Turkish University, Math And Computer Science

Awards

2007 Honorable Mention in Asian Physics Olympiad (APHO), China.

2006 Bronze medal in National Physics olympiad of Turkmenistan.
